

Creating a Lesson

Basic Course:

When on the Lesson Creation page, the user types the title of the Lesson. The user types in the url for any desired Problems. The user clicks the Submit button. The system stores the Lesson in the central database. The system stores the Lesson on the user's creations list. The system displays the user's home page.

Alternate Courses:

User not logged in: After clicking the submit button on the Lesson Creation page, the system will display a Login Required error message. The system invokes the Login use case.

No title entered: After clicking the submit button on the Lesson Creation page, the system will display a No Title Entered error message. The system displays the Lesson Creation page.
