

Detailed Schedule

	Due Date	Development Plan	Test and Demonstration Plan
Jan	30	<ul style="list-style-type: none"> • Draft Webpages <ul style="list-style-type: none"> ◦ Navbar, Home Page ◦ Lesson Page ◦ Manipulator Page ◦ Creator Page ◦ Explore Page ◦ About/Contact us Page ◦ User Profile Page 	<ul style="list-style-type: none"> • The user will be able to navigate through prototypes of the major pages of the website
Feb	6	<ul style="list-style-type: none"> • Continue making draft webpages <ul style="list-style-type: none"> ◦ Account Creation Page ◦ Login Page (Modal?) ◦ Expression Tree Data Representation • Define data layout/class hierarchy • Expression Tree Rendering • Server <ul style="list-style-type: none"> ◦ Rules for setting up/running ◦ Working server that serves website files on localhost • Algebraic Action handling <ul style="list-style-type: none"> ◦ Specify all the kinds of algebraic actions 	<ul style="list-style-type: none"> • The user will be able to view a prototyped rendered expression tree in the manipulation window • Documentation will be written which defines the algebraic actions and their meanings. Initial implementations of these objects will be created. • User will be able to navigate the created pages of the website sent by a server on localhost
	13	<ul style="list-style-type: none"> • Expression Tree Rendering • Define data layout/class hierarchy • Algebraic Action handling • Expression Tree User Interaction • Expression Manipulator Page/UI • Server <ul style="list-style-type: none"> ◦ Error Handling ◦ Research and handling of security issues 	<ul style="list-style-type: none"> • Basic algebraic actions will be implemented, and unit tests will be written which test applying the actions to expression trees. • JSON serialization/deserialization will be implemented on expression trees. • Some user interaction will be supported for manipulating expression trees.

	20	<ul style="list-style-type: none"> • Server <ul style="list-style-type: none"> ◦ Set-up series of dummy files for website to use • Algebraic Action handling • Expression Tree User Interaction • Expression Manipulator Page/UI 	<ul style="list-style-type: none"> • Expression trees will be more manipulatable • More algebraic actions will be implemented • Users can manipulate pre-made Expression Trees •
	27	<ul style="list-style-type: none"> • Algebraic Action handling • Expression Tree User Interaction • Expression Manipulator Page/UI • Database <ul style="list-style-type: none"> ◦ Define Schema ◦ Rules for setting up • Set up AI <ul style="list-style-type: none"> ◦ Determining Heuristic ◦ Skeleton search function 	<ul style="list-style-type: none"> • Expression trees will have all the basic algebraic actions implemented via the UI. • All algebraic actions will be implemented and integrated into the manipulation page. Finished unit tests written. • Unit tests for AI Solver will be implemented
Mar	Break		
	13	<ul style="list-style-type: none"> • Set up AI <ul style="list-style-type: none"> ◦ Work on Search function • Problem Generator • Log-in System • User Accounts • History Implementation • Use JS to put DB data on web pages • Database <ul style="list-style-type: none"> ◦ Database wrapper class ◦ Storage Handling 	<ul style="list-style-type: none"> • Initial implementation of History bar will be done. • Some user-created problems/lessons can be sent from the server/database to the website. • Initial User Account system will be done • Unit tests for Problem Generator implemented • Unit tests for Database adding and reading files will be implemented

	20	<ul style="list-style-type: none"> • Database <ul style="list-style-type: none"> ◦ Delete Handling • Set up AI <ul style="list-style-type: none"> ◦ Work on search function • Problem Generator • Log-in System <ul style="list-style-type: none"> ◦ Google Sign-In implementation • User Accounts <ul style="list-style-type: none"> ◦ Bare bones implementation • History Implementation • Use JS to put DB data on web pages • Expression Creator Page/UI 	<ul style="list-style-type: none"> • History bar will be implemented and integrated into manipulator page • The website will display user-created problems and lessons which it gets from the server/database • Initial implementation of expression creation page will be done. • Users can login with Google • Users can make problems of varying difficulty. • Preliminary AI will be implemented
	27	<ul style="list-style-type: none"> • Set up AI <ul style="list-style-type: none"> ◦ Work on search function • Problem Generator • Log-in System <ul style="list-style-type: none"> ◦ Connect to database • User Accounts <ul style="list-style-type: none"> ◦ Implementation of website and database-facing features • Use JS to put DB data on web pages • Expression Creator Page/UI 	<ul style="list-style-type: none"> • Users can choose a difficulty when using the Problem Generator • Users can view stored data associated with their account • AI search capabilities will be improved
Apr	3	<ul style="list-style-type: none"> • Expression Creator Page/UI • Tutorials <ul style="list-style-type: none"> ◦ Implementation • Spiffy up webpage design (CSS) • Finalize Website design • Set up AI <ul style="list-style-type: none"> ◦ Complete Search function • Deployment <ul style="list-style-type: none"> ◦ Research options 	<ul style="list-style-type: none"> • Expression creation page will be done. • Initial Tutorial pages will be done • AI search capabilities will be improved • Web page design will be updated
	10	<ul style="list-style-type: none"> • Tutorials <ul style="list-style-type: none"> ◦ Design of Content 	<ul style="list-style-type: none"> • User can ask for help on the manipulation page and receive an answer • AI will be finalized

		<ul style="list-style-type: none"> • Spiffy up webpage design (CSS) • Finalize Website design • Work on AI <ul style="list-style-type: none"> ◦ Testing/Training • Deployment <ul style="list-style-type: none"> ◦ Set up 	<ul style="list-style-type: none"> • Web page design will be updated • Preliminary tutorials will be completed
	17	<ul style="list-style-type: none"> • Tutorials <ul style="list-style-type: none"> ◦ Testing and Review • Spiffy up webpage design (CSS) • Finalize Website design • Deployment <ul style="list-style-type: none"> ◦ Testing 	<ul style="list-style-type: none"> • Users can use the tutorial system • Website is deployed and viewable
	24	<ul style="list-style-type: none"> • Tutorials • Spiffy up webpage design (CSS) • Finalize Website design • Deployment <ul style="list-style-type: none"> ◦ Bug fixes 	<ul style="list-style-type: none"> • Web page design will be finalized • Website is finalized
